

KORANDO

SSANGYONG

Car stylists call him simply 'Il Maestro'. We know him as Giorgetto Giugiaro, the godfather of modern car design. From the grille to the tailpipes, every inch of the new Korando reveals the master at work. A blend of Italian form, Korean function and the peace of mind provided by a 5 year limitless mileage warranty.

THE PERFECT FIT

BUSINESS CLASS

Korando ES and EX models include leather upholstery and seat warmers front and rear, with powered adjustment and lumbar support for the driver's seat. The S features luxury fabric upholstery.

A commanding view, with leather seats heated front and rear*, that smoothly adjust to fit you. Controls designed and positioned for intuitive use. Storage spaces that can swallow almost anything you need. It's what we thought you'd want.

*Leather upholstery with front and rear seat warmers standard on ES and EX only

KORANDO

In towing, numbers tell the true story. The technically minded will appreciate Korando's 360Nm of torque, 2 tonnes of towing capacity and 80kg towbar limit. Others will be happy to know it's the most powerful towing car in its class.

NEW 2.0 LITRE DIESEL

Korando's new diesel engine is clean and efficient but also very powerful.

REAL PULLING POWER

The best measure of usable power for towing or acceleration is torque. No other car in the class can equal Korando's 360 Newton metres of torque.

TOWING CAPACITY

Combine engine power with structural integrity and you have towing capacity. Korando can tow up to 2 tonnes.

4 WHEEL DRIVE

Korando EX features Torque On Demand 4x4. This directs drive to the wheels with most grip, so it's always using engine power efficiently.

PULLING POWER

TORQUE ON DEMAND 4X4 SYSTEM

Korando EX features an advanced 4x4 system that operates in two modes, depending on conditions and settings.

AUTO MODE

In auto mode and in normal conditions, Korando remains in two wheel drive to optimise fuel efficiency. When sensors detect a potential loss of grip, the system switches to four wheel drive mode.

LOCK MODE

For very loose or slippery surfaces, the 4x4 system can be locked to allocate drive equally between front and rear wheels. This provides supreme grip and control for low-speed manoeuvres.

HILL START ASSIST

A great ally when towing, this system acts like an automatic handbrake to prevent rolling backwards during a hill start.

ABS WITH ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD)

ELECTRONIC STABILITY PROGRAMME (ESP) WITH ACTIVE ROLLOVER PROTECTION (ARP)

All Korando models benefit from these systems, which employ a variety of sensors to detect imminent loss of control or rollover, and uses electronic control of the vehicle systems to maintain stability.

Korando EX 4x4 talks to itself, thinks and acts many times a second. A network of sensors maintains a stream of reports to the four wheel drive system's central processor, which makes lightning decisions about power and braking. The result: you're always serenely in control.

ADVANCED 4X4

KORANDO

Korando sets a new standard for equipment levels. We won't charge you extra for alloy wheels, rear parking sensors, puddle lamps (on the heated door mirrors), 'follow me home' headlights, windscreen de-icer, remote keyless entry, roof rails and a host of other features.

REAR SPOILER
ROOF RAILS

* At maximum towing weight the trailer must have remote braking capability.

** A guide to fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.
